

Are YOU
designing
your life...

Or is your JOB?

Are you missing out?

Has making a living kept you from living your dreams?

Have you settled for a lifestyle that is less than what you want and deserve?

Have any of these thoughts ever passed through your mind?

- I wish I had more time to be with my family...
- I'd love to, but I have to work...
- I have nothing left after I pay my bills...
- Every time I get ahead, something comes up...
- I would love to go to Hawaii or on a cruise, but...
- I feel trapped...I'm in a rut...
- If only I had other income options...
- There has got to be a better way...

Millions of people live lives of quiet desperation. Today, many careers limit earning potential, while performance expectations increase. And, when you look for another job, companies respond by saying you are either over-qualified or under-qualified. Getting to the next level of financial success and living your dreams seems virtually impossible.

**The truth is...
*the business world has drastically changed.***

Less than a generation ago most people had job security. You could trust that the company you worked for would take care of you. Today, there is a different business model, one that is driven only by profits. We all know people who have experienced a layoff. It is a real wake-up call when, for the very first time, you realize that when you work for someone else you are just a commodity. The truth is, every business owner buys you (the employee) at wholesale and sells you at retail. *The owners are building their dreams—not yours.*

With millions of jobs being sent abroad it is hard-

er and harder to just get by, let alone go on vacation to Hawaii or Fiji. Many families have two income earners with more than one job under one roof... leaving little family time. Family time is overshadowed by the demands of the JOB (Just Over Broke). Job demands are greater than ever before while employee benefits for many are being slashed. Statistics indicate that the average person today will work for 7-10 different companies in his or her career. Over the past three years, there have been 2.3 million jobs lost in the United States. This trend is speeding up, and it is quickly becoming a defining economic issue.

THE BROKEN PROMISE

It was part of the Corporate Dream... a pledge made by corporations to their workers: in exchange for your decades of toil, you will be assured of retirement benefits such as a pension and health care. Now an increasing number of companies are walking

away from that promise, leaving employees with nothing. Many retired people have found themselves returning to the work force just to get by. People believed that they would receive a guaranteed pension, company-paid health benefits, and a modest life insurance policy in their golden years. Unfortunately, these people believed the false corporate promises about retirement and health care.

They didn't get those things...and they won't.

Corporate promises are often not worth the paper they're printed on. Businesses in one indus-

try after another are revoking long-standing commitments to their workers. It began in the 1980's with the elimination of entry-level jobs in lower-paying industries, such as apparel, textiles and shoes, among others. More recently it spread to jobs that pay solid middle-class wages. It began with the steel industry, then the airlines and now automobiles—with no end in sight.

Two major U.S. airlines, Delta and Northwest, turned to bankruptcy court to cut costs and delay pension fund contributions. This followed earlier bankruptcy filings by United Airlines and U.S. Airways, both of which eliminated their guaranteed pension plans. Then on Oct. 8, 2005, the largest U.S. auto-parts maker, Delphi Corporation, filed for bankruptcy protection seeking to cut off medical and life insurance benefits for its retirees. Delphi's pension funds are short \$11 billion.

According to Elizabeth Warren, a Harvard law professor who specializes in bankruptcy, this problem is going to get worse. *"There's no big business that isn't going to figure out a way to get rid of these benefit promises."*

PLAN B— *Getting Your Life Back*

Millions of people have realized that their initial career choice will not create the lifestyle that they have always dreamed about. In fact, many people have lost sight of their dreams and goals. They are fed-up with the limited income, benefit cuts, job demands and commutes.

Perhaps these people, just like you, have a strong desire to spend more time with their families and friends. They want to be in control of their time and their income.

It's time for "Plan B."

Plan B refers to starting a part-time home business to create a full-time income. It is quickly becoming the number one strategy for regaining control of your time and your income. Many have found out how to escape the corporate Rat Race—permanently.

Plan B people are proactive; they have a burning desire to control their destinies. They are taking control and redesigning their lives. These people are on a new path to live their dreams, to achieve their goals, and to have greater life purpose. They are working with a team of people who want to create financial security for themselves and their families.

Imagine for a moment if:

- Your annual income became your monthly income.
- You worked from the comfort of your own home.
- You controlled your time and your income. You had a 6 second commute.
- You worked on building your dream instead of someone else's.
- You could travel around the world and it was a tax write-off.
- You drove the car and lived in the house of your dreams.
- You gave 50% or more of your income to charities.

Just imagine the possibilities...

As unbelievable as this sounds, people around the world are experiencing all of the above, plus a whole lot more. Isn't it time you did as well?

The home-based business boom is fueling the economy. U.S. household incomes rose from \$13 trillion in 1991 to \$40 trillion in 2001. During the recession years of 2001 to 2004, it increased another \$8 trillion!

Benefits of Owning a Home-Based Business

- **Be your own boss.** You set your own hours and dress-code, work where you want, and when you want—part-time or full-time.
- **Low financial risk.**
- **No franchise fees or royalties.** There is minimal overhead and no need to rent an office or buy expensive equipment.
- **Work at home.** Spend more time with your family. No commute or rush-hour traffic. Live where you want to live...your business moves with you.
- **Immediate income.** Earnings can come your first week with an opportunity to earn an above-average income.
- **Lasting income.** You can build an income-generating business that can last for generations.
- **No employees.** No employee-related hassles or paperwork.
- **Significant potential tax benefits.** Legally save thousands of dollars with home-based business deductions.
- **Available for everyone.** No previous experience necessary. Training is provided, allowing you to earn as you learn...regardless of age, sex, race or education.
- **Great income potential**—You are paid according to what you bring to the marketplace. You decide how much you'll earn.
- **Live as you please.** Travel and spend time with your family. You control your time and lifestyle.

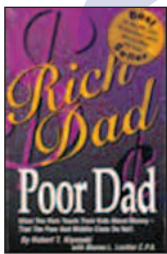

"It is the best kept secret in the business world." —Fortune magazine

"Dollar for dollar, it is the best investment I've ever made."

—Warren Buffet

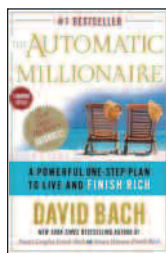

Home-based businesses account for a significant portion of the current economic revolution. These entrepreneurs have gone from relying on an employer for pay and security to creating their own financial security. What was once considered risky—starting your own home-based business—is rapidly becoming known as the smartest way to reduce taxes, increase income, build net worth, and create free time.

It is a fact. Owning a traditional business is out of reach for most people. With hundreds of thousands of dollars in start-up capital required—it is all at risk. The time required for most is far more than a full-time effort, and there are competitors around every corner. There are no solid mentors and no life beyond the business. Home-based businesses provide an alternative for those serious about their net worth and their freedom.

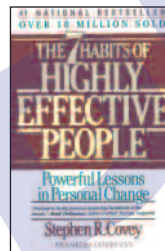

Robert Kiyosaki, author of *Rich Dad, Poor Dad* says, *“You’re actually building an income-generating asset. Home-based businesses give people the opportunity, with very low risk and very low financial commitment, to build their own income-generating asset and acquire great wealth.”*

In his best-selling book, *The Automatic Millionaire*, David Bach says, *“The beauty of this industry is that it’s all done for you. The only thing you need to do is find a reputable company—one that you trust, that offers a product or service you believe in and can get passionate about.”*

According to Lawrence Chonko, PhD., Marketing Professor of Baylor University, *“Of the many business models in the market place today, the one-to-one marketing of the home based business industry is emerging and most efficient and effective.”*

Stephen Covey, author of *The 7 Habits of Highly Successful People*, says, *“The home based business industry helps affirm people’s worth and potential and can open an alternative income stream which can make a huge difference in their life. It is an entrepreneurial opportunity where people can use their talents and their passion towards a greater good.”*

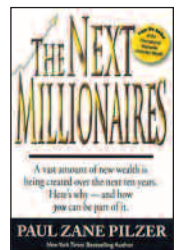

Sandy Botkin, CPA, J.D., author of *Lower Your Taxes* says, *“Job prospects are declining and will continue to do so. You will never get rich until you learn to get your taxes down to the legal minimum. There are two tax systems in the USA—one for salaried employees, one for small/home-based business owners. A home-based business will make you better off than a second income. You will probably save \$2,000-\$10,000 per year by starting your own part-time business.”*

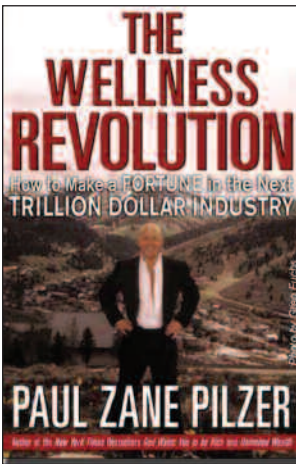

“You will never get rich until you learn to get your taxes down to the legal minimum. There are two tax systems in the USA—one for salaried employees, one for small/home-based business owners. A home-based business will make you better off than a second income. You will probably save \$2,000-\$10,000 per year by starting your own part-time business.”

What once may have been looked down upon as a “peddler’s opportunity,” is now seen far differently by those in the know in modern business. In the past few years alone, home-based businesses have been showcased in *Forbes*, *Fortune*, *USA Today*, *US News and World Report* and *The Wall Street Journal*.

In his most recent book, *The Next Millionaires*, Paul Zane Pilzer forecasts 10 million new millionaires in the U.S. over the next 10 years, and predicts many of them will be people who are getting involved in their own home-based business now. This industry has grown every year for the past 20 years, jumping over 91 percent in just the past 10 years. Today, annual sales exceed \$30 billion in the U.S. and \$100 billion worldwide. Every week an average of 175,000 new people in the U.S. and an additional 300,000 worldwide get started in their own home-based business. Those who work their business with diligence, focusing on the wants and needs of others, will go on to live extraordinary lives. There is an opportunity to be part of a great movement where the world is available to you. You have the opportunity to change your life and the lives of your family members for generations to come—not just with the wealth you can create, but with the wisdom you can acquire to live lives worthy of such abundance. What you do with it today, tomorrow and every day is entirely up to you.

The Next BIG Boom

One seventh, \$1.5 trillion, of the U.S. economy today is devoted to the health-care business. Economist, Paul Zane Pilzer refers to this as the “Sickness Industry”. Pilzer states that by the year 2010, an additional \$1 trillion of the economy will be devoted to products and services that keep us healthy, make us look or feel

better, slow down the effects of aging, and prevent diseases from developing altogether.

Are you ready to get your piece of that pie?

In 1908, Henry Ford’s Model-T launched the trillion-dollar automobile industry. In 1981, IBM’s PC launched the trillion-dollar personal computer industry, which grew so fast those PC sales surpassed

U.S. auto sales in only ten years. The trillion-dollar industry of the twenty-first century has arrived. It promises to similarly revolutionize our lives and offer entrepreneurs and investors the opportunity to amass great fortunes. The wellness industry is on the verge of changing our lives as immensely as the automobile and the personal computer. Already a \$200 billion business, the wellness industry is just now taking off. In just ten years, an additional \$1 trillion of the U.S. economy will be devoted to providing healthy people with products and services to maintain their health. Whether you’re someone who is looking for a “Plan B” exit strategy from your job or an entrepreneur looking for an amazing opportunity, Pilzer encourages you to get in on the ground floor of this burgeoning industry. The distribution of wellness solutions is the best way to create financial success.

The Right Company + You = Success

There is one company right now that is dominating the wellness and home-based business industry. What if you could partner with this business team and change your life forever?

Unique benefits you will get:

- You’ll be on the fast track to business success, because you’ll be at the forefront of the fastest growing industry—Wellness.
- You’ll have stability in knowing that the company is a 12-year-old, debt-free, publicly-traded company that has been featured in many business magazines. The latest was *Forbes* magazine, which recognized it as one of “The Top-five Best Small Companies in America”. *Business Week* magazine ranked it #6 out of “The Top 100 Fastest-growing Companies in America”.
- You’ll have the assurance of knowing that you’re working with highly consumable products that are in demand. Company revenues have already exceeded \$2 billion in ten countries including the US, Canada, UK, Denmark, Germany, Australia and Japan; and over 2 million clients have been served.
- You’ll have no competition. The products are patented and protected with a tremendous amount of third-party validation.
- You’ll be proud of your business team, because they are recognized consistently for providing exceptional customer service; and they get thousands of referrals every week, because people are thrilled with the results of the products.
- You’ll be highly rewarded for your efforts with the industry’s award-winning compensation structure.
- You’ll have a business that includes free educational websites and conference calls with professional training.

The Future of Wellness Care

Attracting Top Medical Experts

JOHN AXFORD, BSC, MD, FRCP, President of the Section of Clinical Immunology and Allergy at the Royal Society of Medicine and a Fulbright Scholar, was so impressed with the science of glyconutrients that he researched this new discovery and joined the company's board of directors. No one from the Royal Society of Medicine has ever before done this with a nutritional company. Dr. John Axford has written two best-selling medical text books, plus over fifty reviewed papers and over one hundred published medical abstracts. He also sits on the board of three prestigious medical journals. This man would not risk his reputation by joining a nutritional supplement company unless he was convinced of the validity of the science behind Glyconutrients. Dr. Axford said this about the company and the discovery, *"You are to be complimented. Sugars are the molecules of the next decade and you are at the forefront of this new frontier."*

BEN CARSON, MD, the world-famous Director of Pediatric Neurosurgery at Johns Hopkins University in Baltimore, who has been named by both CNN and *Time Magazine* as one of the top 20 doctors in America, personally experienced the benefits of glyconutrients. Dr. Carson said in an interview with the *Dallas Weekly*, *"The science made sense to me. God gave us in plants what we need to remain healthy. In today's world our food chain is depleted of nutrients and our environment has helped destroy what God gave us. I do not see glyconutrients as unnatural. I see them as complimentary to traditional medicine. Dietary supplements should become an integral part of health care in this country."*

MARCIA SMITH, ND, PhD, who has over 20 years experience as a health consultant said in an interview *"Even though I have seen many positive effects from eating a good diet and taking supplements, nothing prepared me for the magnitude of improvement I have seen from people adding Glyconutrients to their diet."*

RAYBURNE GOEN, MD, FACP, FACC. *"I have seen more miracles in six years of working with glyconutrients than I have in all of my sixty years as a practicing medical doctor. In my opinion, this is the greatest discovery in the medical field in the past one hundred years."*

JOHN ROLLINS, PhD, a former high-ranking, award-winning, United States Patent and Trademark official, said this when he was asked about the discoveries that he saw during his 20-year tenure at the US Patent Office: *"There have been many significant discoveries, but one stands head and shoulders above the rest; the discovery of a new category of vital nutrients called, Glyconutrients. This discovery might provide the single biggest opportunity to impact health from both ends of the spectrum. First, glyconutrients are essential for normal defense functions, making them one of the best strategies for reducing the risk of disease. Second, they are also necessary to support the normal functions of repair, making them one of the most critical strategies for supporting the body's normal healing functions. This is one of the most important discoveries of the 21st Century."*

"The biggest revolutionary change in the war against disease is represented by Glyconutrients."

—Michael D. Schlachter, MD

Major Milestones

- In February, 2003, a headline on the cover of the Massachusetts Institute of Technology's annual review magazine, *Technology Review* read: "10 Emerging Technologies that WILL change the world!" Glycomics, the study of these sugars or glyconutrients, was listed as one of these emerging technologies. The article stated, "The reason for the excitement around glycomics is that sugars have a vital, albeit often overlooked, function in the body. The medical potential is absolutely enormous."
- In September 2004, our company was honored by becoming the only nutritional company in history to be asked to speak among the top innovators at MIT's prestigious Annual Emerging Technologies Conference.
- In December 2003, our company was the only nutritional company invited to present their science at the 8th Annual World Congress on Medicine held in Geneva Switzerland and sponsored by the United Nations.
- On November 14, 2001, one of our leading doctors and co-author on the patent for Glyconutrients, was the only person from a nutritional company asked by Congress to speak at a Congressional meeting on Bio-terrorism. He explained that the front-line defense against bio-terrorism is a strong immune system, and that only Glyconutrients can provide that kind of protection. Since his address, many Senators and Congressmen are now taking Glyconutrient products.

Massive Marketing Potential

Imagine having a business that gets people emotionally involved because of how they feel when they take and share your products. Here's a glimpse of your potential market segments:

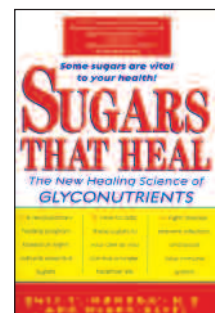

- People with health challenges looking for natural, nontoxic, safe ways to empower the body to heal, correct and repair itself
- Athletes looking for better performance and reduced recovery times
- Parents whose children don't get proper nutrition, especially those looking for alternatives to Ritalin
- GenXers looking for lucrative careers outside of the corporate rat race
- Baby Boomers who are looking for anti-aging and wellness solutions, and are demanding natural alternatives to drugs
- Senior citizens who are looking for safe ways to maintain a higher quality of life
- Those who are looking for safe solutions for Fat Loss (which is much different from weight loss)

And there is a good chance that many of these people would like to improve their financial health by having a Plan B income.

TOO GOOD TO BE TRUE?

Here's what the editors of Amazon.com say about Glyconutrients in their review of the new book, *Sugars That Heal*, "Even tiny amounts of these sugars—or lack of them—have profound effects. In test after test conducted at leading institutes around the world, these saccharides have been shown to lower cholesterol, increase lean muscle mass, decrease body fat, accelerate wound healing, ease allergy symptoms, and allay autoimmune diseases such as arthritis, psoriasis, and diabetes. Bacterial infections, including the recurrent

ear infections that plague toddlers, often respond remarkably to saccharides, as do many viruses—from the common cold to the flu, from herpes to HIV. The debilitating symptoms of chronic fatigue syndrome, fibromyalgia, and Gulf War syndrome frequently abate after adding saccharides. And, for cancer patients, saccharides mitigate the toxic effects of radiation and chemotherapy—while augmenting their cancer-killing effects, resulting in prolonged survival and improved quality of life."

Are you ready to be in control of your time and income? Would you like to work when, where, how and with whom you want? Are you ready to have a purpose driven life?

Real People... Real Stories

Read how they now experience the freedom and fulfillment of *controlling their own destiny.*

Personal Profile: *Two physical therapists with five children wanting more family time and a stable income.*

My name is Rick Moffett. My wife Barbara and I are physical therapists and have been for over 24 years. We had a very profitable physical therapy business for some time, however, it required us to be

present in order to keep the business running properly. When we were not on the job, our income dropped significantly; but while we were on the job, we had no time to spend with family or do the things we really wanted to do. It was this dilemma that caused me to start thinking about alternative streams of income.

us and it made sense, but I was still skeptical. After doing my own investigation and becoming convinced, we made the decision to begin working on what we believed to be our path to both time and financial freedom. Three and a half years later we were able to shut down our physical therapy business and devote our full efforts to our new business. This allowed us to enjoy our new lifestyle, i.e. to do what

*...our prayers were answered;
we just hadn't realized it yet.*

I explored many possibilities, but most of the opportunities required a lot of money and a lot of time to get started. This was not a realistic option for us. I needed something that I could do on a part-time basis. My dream was to have a residual income that would give me the financial and time freedom to do the things I really wanted to do.

Well, our prayers were answered; we just hadn't realized it yet. A long-time friend of mine presented this business to

we were called to do. Our five children are also able to participate in our new business.

Today, we both have the time and financial freedom we were searching for. We believe that anyone can do what we did if they are willing to be trained and work.

Personal Profile: A VP of Marketing and successful lawyer for 20 years found a greater life purpose.

My name is Merri-jo Hillaker.

I became involved in this business in a unique way. Most people join either to get well, utilizing the breakthrough technology represented by the products, or to achieve time and financial freedom available due to the incredible compensation plan. Well, at 42,

I had terrific health (not having been at a doctor's office since I was 19), and I was not only an attorney but also a Vice President of Marketing; so wealth was not an issue.

I saw three friends become totally disabled (one actually passed away with a chronic disease) within six months. Knowing they were eating well and exercising like me, I logically concluded my health was also in danger if I did not get proactive. So, I researched and came across the exciting science of Glycobiology and found these amazing products. Becoming a consumer was easy. Walking away from my entire career two years later was not! After my dad achieved nothing shy of miraculous results, I was truly led by the Lord to follow the mission He placed in front of me: to educate and empower people to take back control of their health.

In 1999, I walked away from my 20-year corporate/ law career to join the mission. Did I look back? Of course, but I stayed the course. I had faith this was the course the Lord set for me, but I also was hearing His greater plans. He laid on my heart that the residual income being produced by this business would be such a blessing for a foundation. As the income multiplied, and is now twice what I made practicing law, I knew again it was not about my needs.

Then the Lord gave me the foundation—Changing Environments—a foundation for the support of broken families. It has four cornerstones: the first and foremost is the spiritual counseling, then the financial, nutritional and self-development. The concept is to restore the American family from the roots. In May, 2005 the foundation was established, and we are now up and running. I still love the mission of this business, but I see this foundation as my heart and soul, touching thousands of families in such significant ways, especially the reconnecting of families with God. With the business income supporting the foundation, we are able as a family to carry out this incredible work. Our services are all free, and this business has made my dream of creating a foundation possible.

If you just stay the course, have the patience, keep the perseverance, and be of service to all those around you, you too will watch your dreams come true.

Personal Profile: A 22 year old took a different path to independence.

My name is Zach Thompson.

Instead of spending a fortune going to college for 4-8 years, only to get a job that wouldn't pay the bills and that I might not even like—I chose this business! I decided to invest some time and money into developing myself and my own residual income.

Less than four years later, I am grossing over \$100,000 per year and have earned multiple all-expense-paid vacations to 5-star resorts. I enjoy time freedom and financial freedom. Now that I've been in this business for 4 years, I can't see why anyone would want a job!

In contrast, many of my friends are stuck in jobs that don't allow them freedom. Perhaps worst of all, many of my friends go to work only for the money—not because they are excited about the impact their work has on other's lives.

Even with all these benefits, the greatest reward I have with this business is helping others enjoy better health—both financially and physically. I can't put a price on the privilege of being able to help someone get well!

Some of my best friends are people that I've met in this business. The inspiration and support in this field is like nothing I've experienced before in my life. As my business continues to grow, I look forward to being able to serve and empower hundreds of thousands of people indirectly with our life-improving nutritional technology. Not bad for a 22 year old kid who has never had ANY job experience before!

Personal Profile: A 911 operator who was stressed out and tired of working the graveyard shift.

My name is Val Card.

Ten years ago I was working full-time as a 911 Operator for The Royal Canadian Mounted Police, and I had been working at that for 11 years. I was getting extremely stressed out and tired of working the graveyard shift. I dreamed of finding something else to do but had nowhere to turn.

My sister, Amanda, worked for one of the large banks in Canada. She introduced me to this business, and after working my business part-time for 1 1/2 years, I had replaced my 911 Operator's income. I was able to quit my

full-time job and work my business full time.

My husband and I have total freedom now and are enjoying travel, biking, skiing, golf, and all the things we love to do. This is so “win-win,” because we have amazing products that are life-changing and a compensation plan that enables us to make an income that I had never dreamed was possible. The only thing I wish is that someone had told me about this 20 years ago. I am so grateful to be part of this company, to have the life-changing benefits of the products, to have new friends all over the world and to be part of this awesome team!

Personal Profile: A high school teacher, coach and athletic director looking for a part-time way to make a full-time income.

My name is Hal Wertich. After 30 years in high school teaching and coaching, I finally found the business I had been searching for. Not only did I find the perfect business model that I could work part-time, but I also received a health benefit. In a very short time, I got relief from arthritis in my knees that had been causing

me to limp with a lot of pain. I am now, once again, able to work out regularly, ski, play golf and generally do all the things I used to do.

When I began my business in May of 2004, I was routinely working 60 hours a week as Athletic Director at one of the top high schools in North Carolina. I started out working what I thought was part-time but was really some-time, and I was able to earn monthly checks of \$100-300.

When I actually started to put in part-time hours, my monthly checks became \$500-\$1500. That got my attention. I got more serious about working my part-time business. My goal was to retire early from teaching.

On May 31, 2006, I reached my goal. My part-time business income matched my teaching income. In just two years, I established an income that took 30 years to reach in teaching!

Since that day, I am full-time in my business with the time-freedom I had never before experienced. My income continues to grow (with NO LIMIT to how much I can earn), I set my own hours and I am blessed to work with a great company that happens to have a great mission.

Personal Profile: A sales professional who was frustrated with job demands and not having enough time for family—found his purpose.

My name is Ian Harvey.

For over 20 years I had been in traditional sales. Although I was successful, it was never enough for my employers. Once I hit a target, the next week I would get a higher one.

If I missed a target, I would get an un-motivational talk. It seemed no matter how hard I worked, I

wasn't making any financial progress even though my work schedule was from 7 a.m. to late into the night. I was at work more than I was at home with my family.

When I was first approached about this business and products, I dismissed it. I had never taken a supplement in my life. I just didn't see the opportunity or the benefit of the products.

For over 20 years, I suffered from two major health challenges. I just had to try the products to prove they wouldn't have any impact. All I proved was how wrong I could be. My prayers were answered! My body started to heal and repair itself.

At that point, I knew I had been guided to this business. It has become the biggest calling of my life. Today, I travel the world educating others about the products and the business opportunity. I have more energy and feel better than I did 20 years ago.

I was so excited because, for the first time in my career, I felt I had a purpose. I felt my whole life had shifted from selling and convincing, to educating and sharing. It didn't take me long to adjust and I have never looked back. There are still some days I cannot believe the impact I am making on so many people's lives. Everyday someone thanks me for introducing them to the products and for changing their lives.

Prior to joining this business I had just gone through a divorce, an extremely difficult period in my life. It had left me mentally, physically, and spiritually bankrupt. It seemed all that was left in my life, (except my two wonderful daughters), was my job and a company car. You can imagine some of the responses I got from my closest of friends when I told them I was about to give that position up and join this business. They really believed I needed

help. I gave my job up; I borrowed a car from a friend and started on my way. That day I made the decision to become a full-time associate, and I am so glad I did.

My goal was to reach the top leadership position within 12 months. I reached it in 10 months. I have traveled the world on incentive programs with this business to destinations that many only dream about. My debt has been reduced massively. I am no longer emotionally, financially, or spiritually bankrupt. Quite the reverse, I drive my own Mercedes. I have a worldwide business that stretches from the UK to Australia.

Everyday, I help people change their lives in all aspects, and I am so thankful I was introduced to this business. It is a journey where each day I wake up looking forward to the day ahead. It is a journey that puts me totally in charge of how far I travel and at what speed. And it is a journey that I would recommend everyone take if they are looking for more out of life.

Personal Profile: A business owner whose push for success almost killed him.

My name is Bob Hooper. I owned three insurance agencies with six employees, a horse farm, and a debt load that kept me chained to my desk six days a week. I made a lot, spent a lot, and dread-

ed Mondays. My health was in shambles. A diagnosis of MS (Multiple Sclerosis) in 1996 was a huge wake-up call. The doctors advised me to avoid stress. HA!! Like a crazed juggler, I had so many “balls in the air”, I needed four arms just to keep them up. The stress mounted!

In December 1997, all that changed. Thanks to the loving determination of one of my clients (I threw her out of my office twice) I was introduced to these products and business. At first, I skeptically ingested the nutrients. Then I began forcing them on my equally skeptical fiancée, JoEllen. Next, I shared them with clients, family, friends, and anyone within 30 feet of my voice. I became a zealous advocate as we watched my health improve dramatically, and I wanted everyone to know. “Health advocates” was not exactly a title people would easily associate with us,

but after feeling the positive effects of good nutrition, every part of our lives changed. We took time to walk, relax, exercise, meditate, and explore the world around us. We became committed to an abundant lifestyle of health, financial, spiritual, and time freedom. JoEllen, is now my wife, and together, we travel the world sharing our story and helping others begin their journey to a healthy

lifestyle...on all levels. We combine our skills to serve others. JoEllen has a background in training and coaching. Blended with my business experience, we have been able to attract and empower international teams of leaders who are equally committed to making a positive difference in the world. Now we take the time

to enjoy visits with our parents, children, grandchildren, and siblings. What a pleasant reward for helping others. We go on at least two luxury vacations a year for free—places like Hawaii, Mexican resorts, and Caribbean and Alaskan cruises. These trips have become “family” reunions with our business associates. Not many people can say, “MS has been a blessing in my life”. It brought me to this business, and this business brought me alive.

Personal Profile: A single mom who was struggling financially just to get by.

My name is Carol Merlo. I was working a 9-5 job making just enough to have a small two-bedroom apartment and a used car. I didn't have enough money to invest or purchase a home. I never went on vacation and never purchased anything that wasn't a necessity.

I was a single parent with a small child and wasn't able to be home with my son. He was being raised by babysitters. I had very few dreams. I didn't believe I was capable of improving my lot in life.

I was intrigued by the concept of residual income. I understood sales and marketing, but had never been

exposed to this type of business, but I liked the idea. I just didn't think I had what it takes to, "sell" to people and make a difference.

I had PMS and asthma, which I considered to just be part of life. I had no idea nutrition could affect them; so when I was introduced to the products, I was excited that something could improve my life. I decided to get involved in the business and start taking the products. It worked incredibly well for me.

I fell in love with the company and the products. I really enjoyed educating others on the benefits of the products and business. The science behind the products was fascinating to me, so I studied it. I also studied the business model and learned why it was the most powerful one.

I decided to quit my job and commit myself to this business full-time with my future husband, Bill. We helped a lot of people get started on the products, but not too many were interested in starting a new business. At the end of two years, we were making about \$3,000 per month, which was more than I had been making at my job, but clearly not enough to move forward in life.

Bill began to share with his resource list what he knew about the products and the business. Our income started growing exponentially. It grew up to \$1,500 per month for 10 months in a row. It was the most amazing thing I have ever experienced! I can remember the first \$10,000 check we got. I never believed I could have this much money.

Because of this business, we have the life of our dreams. My son needed special help in school, and we were able to get him the help he needed, because we had sufficient money. We were able to buy our dream house—the first one I've ever owned. We have been able to establish credit and eliminate all credit card debt. We go on vacations, travel all over the world, buy the clothes we want, and help others when they need it. In other words, because of the income we receive from this business we have become able to have a life of significance.

Furthermore, having this as our vocation and passion is something that is continuously rewarding spiritually, mentally, and emotionally. We get to help people improve the quality of their lives in a meaningful and powerful way. We get to help people...not only with their physical health but also with their financial health. We are so blessed to be part of this business.

Personal Profile: A corporate down-sizing, and a traditional business going bad, results in starting over at age 50.

Our names are Lowell and Shirley Thomas. After rising to the top in the corporate world, and being victimized by downsizing, right-sizing, leveraged buy-outs, and corporate bankruptcies, we started our own business. After two and a half years, we lost it all. Everything!

Starting over at fifty and being deep in debt was not easy. With no money to start another business and being classified as "over qualified" (a nice way of saying "too old") for everything we wanted to do, we decided to go into the home-based business industry. There were many reasons for choosing this, not the least of which was the small amount of money it takes to get involved. The second reason was the potential for an unlimited income. (Remember we were deep in debt and could never hope to recover with a "job.") The last, but maybe most important reason, is the risk-to-reward ratio. We both agree on this one statement. "No other industry offers you the opportunity to start a business for such a small an investment that has such a huge potential for success."

We got involved because we saw the power of these amazing products and the business. Our first check with this business was a whopping \$14! We jumped to about \$20 the second month and rapidly grew to \$60 or so by the third month.

We earned over \$100,000 that first year and over \$200,000 the next year. Things grew pretty quickly from there. Accumulative

income from our business has exceeded \$3,000,000. It has changed our lifestyle and given us our lives back. We are so grateful for this company and this business.

We truly believe that if you will set your goal to succeed in this business, stay on course (remembering all distractions are equal) and put forth the effort, you too can attain the success you have always wanted. Or as Shirley says so often, "Don't exit the freeway one exit too soon."

Our favorite saying, especially while enjoying traveling to exotic places like Australia, Hawaii, Mexico, the Bahamas, The British Virgin Isles, Alaska and just hanging out in Colorado is, "There may be a better way of making a living, but we can't think what it might be."

Personal Profile: Stressed out and no job prospects.

My name is Gary Henderson. March, 2002, turned out to be the turning point in my life. A phone call came from my eldest daughter telling me about a company from the USA that was launching in New Zealand. Sharyn didn't know anything about this company but felt that I should

investigate it. I did and by the end of May, I had discovered the beginnings of something really BIG.

Prior to getting involved with this business I had gone through hell on earth. In the previous 8 months, I had sent out 17 job applications—none of which resulted in a job. My blood pressure was 204/104. To say I was stressed was an understatement.

After getting on the products, I experienced results pretty quickly. In no time, my blood pressure reduced to 140/80. I was thrilled to say the least.

As I started sharing my story, people started using the products and got involved with this business. My first check was \$2600 Dollars AUST (around \$1600). I didn't really understand this business. I just listened to my coach, who told me to go out and continue to tell my story.

Through the next 18 months I experienced the most incredible lifestyle changes, along with an even more encouraging series of health changes. The biggest thing I have learned through this time is that there is no need to be shy about sharing this information with EVERYBODY. "Help other people get what they want and you will get what you want." I love the community of people who are involved with this company.

Is this the greatest opportunity on the planet?

Unquestionably, YES. I have enjoyed seven international holidays over the past 18 months. But it does require passion, belief, and a BURNING DESIRE. I am thankful for this business from the bottom of my heart.

Personal Profile: A wife/mother determined to help her husband get off the road and back to being part of the family.

My name is Jill Welker. As a former athlete and health education teacher, I have always been interested in nutrition. When first approached to look at this technology, though very skeptical, I decided to consume the products. After attending my first national event, I saw first-hand the integrity of the leaders in this company. What I learned went from my head to my heart. I became compelled to share this discovery with others.

I eventually began to pay attention to the possibility of income potential. What drove me to build my business was a desire to help my husband get off the road from selling sporting goods for 25 years. He drove 50,000 miles per year and was "burned out" to say the least.

Once I understood the concept of residual income, I realized how much more income potential we had in this business than in what he was doing, not to mention all the time he spent on the road away from our home and family. My husband is now coaching baseball, which is his passion. He and I work our business together and are "on the road" when we choose. My husband no longer travels weeks at a time because of a job. He can spend all the time he wants at home and with our family.

An added perk is the potential my kids have for significant side-income as they pursue their career dreams. One son is coaching college baseball and the other is playing professional baseball. The real "dream come true" is having the financial means to follow your heart's desire.

Personal Profile: A corporate employee leaves his job to be a dad/husband, but fails three times in home businesses.

My name is Terry Petrovick. Prior to getting involved with this business, I was in the corporate world for 17 years. I started my career programming computers at IBM. I woke up one day with a six figure income,

feeling like I was winning the rat race but living like a rat. I had lost sight of my goals and dreams. I didn't like my boss, the games people played to get ahead, or the com-

mute. Yet, the thing that bothered me the most was that I didn't have time to be the Dad or the husband that I wanted to be. I was missing out on my kids growing up. I felt like time was going by so fast that I was missing out on the important things. I realized I was too busy making a living to live a life.

So, I left my safe and secure job to start my own home business. Like many people, in a four-year period, I was involved in three businesses with NO real success.

By accident, I was then introduced to this company. I was amazed! When I called home to talk to my wife, Amy, from Orlando, Florida, I told her that I wanted to start another business. There was a long pause on the phone...then she started crying and said, "Terry, I think it is time for you to get a real job again." I said, "Trust me, this one is different."

And it was. It had lots of third-party scientific validation. MIT described it as 1 of 10 emerging technologies that would change the world. The products were patented, had no competition, and had mass-market appeal. I thought to myself, "WOW, this is a REAL business with REAL products that actually work, with thousands of scientific studies validating it."

I had never seen anything like it before. The personal conversations that I had with people that weekend made it sound too good to be true. But I soon realized they were true, and this was real.

In my first month I earned over \$1600. Within a year and a half, my monthly income was over \$12,000. Since then I have

been paid over one million dollars! I earn more money today than I ever did in the software industry.

Thanks to this business we have had free vacations in some incredible places like Hawaii, Acapulco, Bali, London, and even Alaskan and Caribbean cruises. It has been incredible. I have my life back. This is a business that will be in our family for generations because my kids, who are now 21 and 23, have very successful businesses as well.

As simple as it sounds, this business will work if you work it.

Personal Profile: A medical doctor, single mom with no family time.

My name is Connie Godenick, MD. I was a busy practicing part-time Family Physician. I found myself feeling frustrated, because I didn't have enough time at home with my daughters. I was also dealing with mounds of paperwork, which distracted me from my patients. Added to that was the malpractice crisis, the expense (and poor efficacy) of prescription drugs, and a public that was not motivated to assume responsibility for their own health. A doctor in private practice isn't earning money unless he/she is seeing patients. All other activities are ancillary. Unfortunately, there were TONS of demands on my time for these other "non-productive" activities. Calling in prescriptions, calling back lab results, filling out endless forms, battling HMO's, and dealing with Medicaid to get prescription drug coverage, all ate up my time. The all-too-frequent drug seeker masquerading as having bona fide pain only added to my woes.

I was introduced to this business without the thought of it bringing me time and financial freedom. Initially I was only interested in the science and the health benefits for my patients. I quickly discovered that there were tangible rewards to sharing something that I felt ethically bound to share anyway. How could I keep news like this to myself?

In 4 1/2 years on a part-time basis, I had replaced my physician's income. Since then my income has doubled. I now have significant tax advantages, which effectively makes my income even higher. Additionally, I have the immeasurable satisfaction of helping 100's of folks get OFF drugs, which is a far cry from just putting them ON drugs. I've been called an "Angel" by countless individuals who credit their good health to hearing about this technology.

Many of these people have reaped significant financial rewards as well.

A significant personal benefit for me was that I met my husband through this company. It is awesome to have the synergy of a like-minded life partner who shares my passion for this wonderful technology. Life couldn't be any better!

YOUR CHOICE

**Time waits for no one.
You can choose to ACT NOW
or be left behind...**

With work and dedication you can:

- Turn your monthly income into your weekly income.
- Work from the comfort of your own home.
- Put your effort into your dream, not someone else's.
- Have more time for yourself and for your family.
- Pay off all your credit card debt, buy a new home, a second car, or take your family on the vacation you've been dreaming about for years.

It all comes down to choice. You can stay the way you are and live the life you have, or you can take advantage of this opportunity and be in control of your income, time, and destiny.

Yes...all this is possible...

Picture yourself changing someone's life every day with an amazing new discovery that enables the body to heal, correct, and repair itself. Lives are changing for the better because you took an interest. For many, you are the answer to their prayers.

Imagine a future where you have been blessed on more levels than you ever could have thought possible. You work hard and earn an incredible income from the comfort of your home! With your business you have no commute, no inventory, no employees, no accounts receivable, and no facility. Best of all, you get up every morning when you are done sleeping and you pick the people you want to work with!

Make no mistake... this lifestyle IS within your reach!

Get back with the person who gave you this information and get on a new path to design your life.
